2. Simplicity Plans (SIM only plans with no Minimum Period) are subject to status and credit-check. You may give us written notice that you wish to end your SIM only contract or change plan at any time, and this will be effective 30 days after we receive your notice. You will be required to pay the applicable monthly charge for your SIM only plan until the end of this 30 day notice period.

4. If you take a SIM only plan, your current mobile phone may be latched/locked to another network and you may need to obtain an unlatching/unlocking code from your current network operator and service provider. This code is not the same as your PIN code. Failure to enter the correct unlatching code may result in your mobile phone becoming permanently blocked. We accept no responsibility for mobile phones blocked in this way or for any costs incurred in the provision of this code.
5. Unless otherwise stated, call prices exclude VAT, are quoted by the minute, and are charged in one second increments. Each call is charged excluding VAT and then rounded-up to the nearest penny.

2. For customers connecting, re-signing, upgrading on or to or adding additional connections to these tariffs and Bolt Ons after 24 June 2010 the following terms will apply in place of those in paragraph 1 above:

The Bolt On allows you use of our data network, and if applicable UK Wi-Fi, via your mobile phone (internet capable and/or Wi-Fi accredited phones only). All data usage must be for your private, personal and non-commercial purposes. Regardless of the amount of data you use, you must not use your sim:

- in, or connected to, any device other than the one which it was supplied with or intended by us for use with (for example a mobile phone sim only tariff sim is intended for use in a mobile phone not a modem. This includes putting your sim into a modem, modem usage or internet tethering on your device unless stated); or
- in such a way that we reasonably believe adversely impacts the service to other O2 customers.

We reserve the right to use appropriate traffic shaping or throttling measures to protect our network from types of data usage which we think might impact on levels of service for customers at specific times of day and/or in specific locations.
