Your phone package - Accessories

When you open the box, check that all the items are present:

1 - Phone
2 - Mains charger
3 - Battery
4 - User manual

Accessories

You can also find (as an option) or order the following accessories:

- Pedestrian kit (*)
- Extra battery
- Extra charger (*)
- Desktop support (*)
- Cigar lighter adapter (*)
- Colour cover
- Hands-free kit (*)
- Strap

For more information: www.planetsagem.com

(*) These accessories are identical to the ones provided for the myX-3, myX-5 and myX-6 series.
Description

Programmable keys and Shortcut keys

Stop key:
- Hold down: Stop
- Press briefly:
  - In a call context: Rejects a call - hung up
  - In menus: Return to home page.

Start key:
- Press briefly: Starts phone
  - In call context: Call - reception of a call - hands-free mode

Left programmable key:
- In home page: Access to certain functions (shortcuts)
  - In menus: Cancel (or return) as indicated on screen
  - During call: Reduces volume

Right programmable key:
- In home page: Access to certain functions (shortcuts)
  - In menus: Accept, choose as shown on screen
  - During call: Increases volume

Top key:
- Previous choice / increase value / top

Down key:
- Down choice / reduce value / down

Left key:
- Up input field / move left

Right key:
- Down input field / move right

* Key:
- Hold down: In home page: Silent mode
- Press briefly + OK (right programmable key) activates or deactivates keypad locking
  - In call reception mode: Short press stops ring tone
  - In ring tone setting mode: Activates/deactivates ring tone

# Key: Zoom mode (see message and WAP menus)
Principles of navigation

These basic principles bring a great deal of intuitiveness to your telephone.
All the active areas on a white background (icon selector, programmable keys, menu selector, choice list).

Accept by pressing the right programmable key.
Cancel by pressing the left programmable key.

The tabs on the sides at the bottom of the screen refer to the Programmable keys (and not to the left/right keys).

In the menus a title bar indicates the down higher level.

The down/top navigation keys are used to navigate from one menu to the down within the same menu structure.

The right programmable key is used to go from a menu to a sub-menu.
The left programmable key is used to go from a sub-menu to a menu.

The first menu level can be identified by a large animated icon in the centre of the screen.
The second menu level can be identified by a large static icon in the centre of the screen.
The lowest sub-menus are lists.

The Stop key (press briefly) is used to return to the home page (current function is abandoned).
Home page

The home page contains the following:

1 - The title bar icons:
- Battery
- Calls forwarded
- Call (establishing the call)
- Call (hands free)
- SMS (reception of an SMS)
- Silent mode
- Message in answer phonebox
- WAP (@)
- Home zone
- HPLMN / roaming
- Keypad locking + WTLS (exclusive functions)
- Protected WAP logon
- Protected WAP logon icon with certificate
- Signal strength level (5 bars).

2 - Date and time, in digital or analogue mode

3 - Network provider

4 - Tab centred on down line:
the main "menu" tab shows that the menu can be accessed via the down / up ▼ ▲ keys.
The following information may also be displayed:
- "1 message received"; or "1 call".
They can be deleted by pressing Stop ◄ key briefly.
Activating your phone

Information on the SIM card

To use your phone, you have a smart card called a SIM card. It contains all the information needed by the network as well as other information unique to you and that you can modify:

- Secret codes (PIN(s); Personal Identification Numbers), these codes allow you to restrict access to your SIM card.
- Phonebook,
- Messages,
- How special services work.

Your phone is compatible with the different SIM cards offered by operators.

It is also compatible with the SIM/WIM cards (cards containing the WIM module in addition (WIM = Wireless Identity Module) that is used for secure WAP communications.

WARNING

This card must be handled and stored with care to avoid damaging it by scraping or bending it. If you should lose your SIM card, contact your operator or your SMC (Services Marketing Company) immediately.

Comment: do not leave your SIM card within the reach of young children.
Activating your phone

Installing the SIM card and installing the battery

The SIM card is inserted under the phone’s battery. Ensure that the phone is switched off and the charger disconnected.

1. Turn phone over and remove rear cover by lifting bottom end first.
2. Take out battery if already installed.
3. Slide card fully under retaining plate with gold-plated contacts facing phone and bevelled corner pointing as shown on drawing of phone.
4. Insert battery into position by first positioning top section with connectors.
5. Replace cover by engaging top hook first, then push down back of rear cover.
Activating your phone

Changing the cover

1. Remove rear cover as above. Turn phone over.
2. Lift front cover in same way as rear cover. Remove panel (electronic card).
3. Position keypad in new cover, ensuring it is free of dust. Insert panel into front cover.
4. Do as above to replace rear cover.
Activating your phone

Charging the battery

Your phone is powered by a rechargeable battery. A new battery must be charged for 4 hours at least before being used for the first time. It reaches its optimum capacity after a few cycles of use. When your battery has been discharged, the phone displays the state (empty battery icon flashes). In this case recharge your battery for at least 15 minutes before making any more calls so as to avoid being cut off mid-call.

To recharge the battery:
Connect the charger to a mains socket.
Plug the end of the cable into the connector at the base of the phone.
The phone starts to charge up, the battery charging light flashes to indicate charging. Charging stops by itself.
Disconnect the cable.

It is possible that the battery may heat up slightly during charging; this phenomenon is normal.

WARNING
There is danger of explosion if the battery is replaced incorrectly or if it is exposed to fire.
Do not short-circuit it.
The battery does not have any part that you can change.
Do not try to open the battery casing.
Use only the appropriate chargers and batteries shown in the manufacturer’s catalogue.
Used batteries must be disposed of in the appropriate places.
It is advisable to remove the battery if your phone is not used for extended periods.
Activating your phone

Do NOT obstruct the antenna with your fingers

The antenna is integrated in your phone, under the back cover at the top. Avoid putting your fingers on this area when the phone is switched ON. If your fingers obstruct the antenna, the phone may have to operate with a higher power level than usual, decreasing its efficiency quickly. It could also affect the quality of your communications.

WARNING
The use of a hands-free kit is recommended when using the phone frequently.
My phone in 5 minutes

Getting started
You are now ready to use your phone for the first time.

Switch on the phone by pressing the Start key. A short display appears.

PIN Number
This is your SIM's secret code.

If access to the SIM card is protected, the device prompts you to enter the PIN number:

Enter the code between 4 and 8 digits given to you when the SIM card was issued. These digits do not appear on the screen for security reasons.
Press the right programmable key to accept.

If your phone indicates that the SIM is missing, press the Stop key to switch off your phone and check that the SIM card is correctly installed.

WARNING
If a wrong PIN number is entered three times in succession, your SIM card is blocked. You must then:
- Enter "***0***".
- Enter the PUK (Personal Unblocking Key) code provided by your operator, and accept.
- Enter your PIN number and accept.
- Enter your PIN number again and accept.

After 5 or 10 failed attempts (depending on the type of SIM card), the SIM card is definitely locked. You must then contact your operator or your SMC to obtain a new card.
My phone in 5 minutes

Setting time and date

When you use your phone for the first time, you need to set the date and time.

In due course, when the battery is completely discharged, or if it has been removed, you will be prompted systematically to confirm date and time.

Setting the date:
Set the date by entering it directly in numerical form or by using the down/up keys to decrease or increase the default values.
Use the right key (or left key ) to access the next (or last) data input field.
Once the date is correct, press the right programmable key to accept.

Setting the time: Same procedure as for setting the date.

Network

From now on the phone hunts for a network on which it can make calls.
If it finds one, it displays the name of the network on the screen. You are then ready to send or receive a call.

If the network icon appears, calls are possible on your operator’s network.
If the letter R and a network name are displayed, calls are possible on the network of a different operator.
If the letter R is displayed without any network name, only the emergency services are accessible (ambulance, police, fire brigade).
If the network icon flashes, the phone is in permanent search mode. There is no network available. The signal strength indicator received allows you to display the quality of reception. If it indicates less than three bars, search for better reception in order to call in good conditions.
My phone in 5 minutes

First call

Dial the number of your correspondent.
Press the Start key.

During the call, the call in progress icon flashes on screen and tones may indicate the establishment of the call.

Once communication has been established, the call icon stops flashing.

You can adjust the sound level (volume) using the left and right programmable keys.

At the end of the conversation press the Stop key to hang up.

International call
Press 0 (hold down) to display "+", then dial the country code without waiting for the dial tone, then the number of the called party.

Emergency services
Depending on the operators you can obtain the emergency service with or without SIM card or when the keypad is locked. It is enough to be in an area served by a network.
To obtain the international emergency service, dial 112 then press the Start key.
My phone in 5 minutes

Receiving a call

When you receive a call, the number of your correspondent is displayed when it is presented by the network.

Press the Start key or the right programmable key to answer, and speak.

To refuse the call, press the Stop key or the left programmable key.

To stop the ring tone or the vibrate, without refusing the call, press the key.

WARNING:
Pressing the Start key a second time launches hands-free mode, in this mode do not bring the phone up to your ear.

All the numbers corresponding to incoming and outgoing calls are logged in the list of recent calls.

Switching off

Press the Stop key for one second.
The end message is displayed. The phone switches off.
First setting: Ring tone

We want to familiarise you with the interface of your new phone, using a simple setting: choosing a ring tone and adjusting the volume.

In the home page, press the down key to access the main menus. The first menu offered is Phonebook. Press the down key four times to access the Sounds menu. Enter this menu by pressing the right programmable key.

You can access the second level of the menu that contains four sub-menus: Ring tones, Vibrate, Silent mode, beeps. The first sub-menu offered is Ring tones. Enter by pressing the right programmable key.

Volume and ring tone

This menu allows you to allocate a ring tone to each type of event.

In the home page, press the down key to access the main menus. The first menu offered is Phonebook. Press the down key four times to access the Sounds menu. Enter this menu by pressing the right programmable key.

You can access the second level of the menu that contains four sub-menus: Ring tones, Vibrate, Silent mode, beeps. The first sub-menu offered is Ring tones. Enter by pressing the right programmable key.
First setting: Ring tone

With the help of the down / up ❯ keys select the type of function where you want to change the ring tone from the proposed list (Alarm, Calls, Messages and Fax) and accept.

Enter by pressing the right programmable key.

Using the down / up ❯ keys select the ring tone from the list offered.

Enter by pressing the right programmable key.

For every new selection, you will hear the corresponding ring.

If required, press the Silent mode key to cancel the sound.

Adjust the volume using the down / up ❯ keys.

The volume is adjusted over a scale of 1 to 4.

The ring tone is played at the chosen level whenever a change is made.

You can select "+" volume to choose a ring that starts quietly and rises to a crescendo.

Accept by pressing the right programmable key.
Phonebook

The phonebook allows you to store numbers that you call regularly. These numbers can be stored in the SIM card or in the telephone.

Different icons inform you of the position of the phonebook where the number is stored:

- Your SIM card phonebook
- Your telephone phonebook
- Your SIM card’s fixed dialing.

Using the phonebook

In the home page press the down key to access the main menus. The first menu offered is phonebook.

Press the right programmable key corresponding to the accept tab to enter the menu.

The list of your correspondents appears, by default, the cursor is positioned on the first name in alphabetical order.

If you are using your telephone and SIM card for the first time, the phonebook list will be empty, only the Phonebook Menu function will be available.

Select a contact from the list using the down/up keys. Then press the right programmable key.
### Phonebook

You can also enter a letter to access directly the first contact starting with this letter.

If you know the memory number of this contact on the SIM card (say 21 for example), you can enter 21# directly.

Choose from the options offered:

- **See contact**
  The first menu offered is See contact. Enter.
  The detail of the store appears (location, call group, name, number).

- **Modify contact**
  Modify contact. Enter. Using the down key.
  Modify name if required, and Accept.
  Modify number if required, and Accept.
  Modify call group if required, and Accept.

- **Delete**
  Select Delete. Enter.
  Confirm deletion of entry with Yes.

- **Call**
  Select Call. Press the right programmable key to start the call.
  You can also select the party to be called from the phonebook, and press the Start key to make the call.

- **Send message**
  Select Send message. Accept.
  Text editor opens automatically.
Phonebook

The phonebook menu allows you to create new contacts, to create call groups and to check the memory available to store new contacts.

Phonebook menu

In the Phonebook screen, press the right programmable key to enter the menu. Press the up key to position the cursor on the Phonebook menu and accept. Choose from the options offered add contact, call group, memory, my numbers).

Add contact
Select Add contact and accept and press the right programmable key to enter the menu. Choose the place where you wish to enter the contact (SIM card or telephone) using the down/ up keys, and accept. Enter name of your correspondent and accept. Enter telephone number and accept. Choose a call group to which you want to allocate this contact and accept. (See page 25: call groups)
Phonebook

Phonebook menu

<table>
<thead>
<tr>
<th>Phonebook</th>
<th>Available memory</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>247 / 250</td>
</tr>
</tbody>
</table>

- **Call groups** (See page 25)
- **Memory**
  - Select memory and accept.
  - The screen displays the number of free locations on SIM card and in telephone itself.
- **My numbers**
  - You can create the entries corresponding to your own numbers in order to consult them when necessary.
  - Select My numbers and accept.
  - Enter the different details and accept.
Phonebook

You have the facility to group your contacts into call groups. It is possible to allocate characteristics to each group (icon, ring tone, vibrate).

Creating new groups:
Do same as above to obtain the phonebook menu and accept.
Press down key to position the cursor on Call groups and enter.
By default, the cursor is placed on Call groups menu, accept.
Choose one of the options offered (Create group or memory available).

Creating a group
By default, the cursor is placed on Create group, enter.
Enter group name and accept.
Choose the icon, ring tone and vibrate mode that you want to allocate to this group (accept after each step).

Memory
Select memory and OK.
The screen displays the number of locations available for new groups.
Messages

The message menu brings together the following two types of messages: SMS and EMS (an EMS is an extended message, longer than an SMS with images and sounds added). It is possible to exchange different types of contents: text, call group icons, screen backgrounds, tunes, WAP bookmarks.

From the Messages menu select the Compose menu and enter.

By default, the language used is the language activated in the telephone’s menu display (or English if a language not supported by Easy Message T9™ has been chosen for the menus).

When the text has been entered, the right programmable key (choice) can also be used to access the functions offered:

Send is used to send the message by entering the correspondent’s number.

T9 options (see next page)

ABC mode (see page 28)

123 mode (see page 28)

Cancel is used to delete all text entered

Activate/deactivate zoom is used to modify size of characters

Store is used to save a draft in memory

Formatting is used to enrich a text

Insert to insert an image or sound into your message (see page 28).
The Easy Message T9™ helps you to conveniently enter your short messages.

Using T9 Mode

Press once the key corresponding to the letter chosen and make the word by continuing to press the keys corresponding to the various letters without paying attention to the display, until you have finished inputting the word; it then appears in inverse video.

If the word offered is what you wanted to enter, press the 0 key to accept it, create a space and move to the next word.

However, it is possible that several words exist in the corresponding dictionary for the same sequence of keys pressed. If the word that appears is not the word you expected, press the right programmable key (indicating ) to scroll through the words held in the dictionary corresponding to this key sequence.

When you find the chosen word, press the 0 key to accept it, create a space and move on to the down word.

Press the right key to simply accept the characters entered without creating a space and moving on to another T9 word.

If the word you are expecting is not proposed, please go on adding characters until you get the message “Add a word?”. Select “Yes”, correct the word when necessary and press “OK”.

Draft T9

hello

Delete Options

Draft T9

hello

Delete Options
Messages

In the input screen, the right programmable key is used to access other input options.

Input modes

The ABC mode is used to enter words that do not exist in the dictionary. To obtain a letter, press the corresponding key several times, the letters and the number scroll past.

Mode 123 is used to insert numbers.

Insert mode is used to insert symbols, animations, call group icons and tunes: the SMS then becomes an EMS. Images and sounds can be two types: pre-defined or customised. Pre-defined images and sounds are smaller in size, especially suited to exchanging messages.

Upper case:
A quick touch of the \ key will display the next letter in upper case.

Two short presses on the \ key allow you to switch to upper case editing mode for the whole message.

Punctuation characters
Punctuation characters are obtained with the help of key 1 (except in 123 mode), or with the help of Insert mode (fast access via the \ key).

Accented characters
Accented characters are generated automatically in T9™ mode.

In ABC mode accented characters are available by pressing the key supporting the non-accented character in succession.
Messages

The number of messages stored in the SIM card varies depending on the card's capacity.

Receiving messages

When you receive a message, an audio signal sounds (the one selected in the Sounds menu) and the message icon appears on your telephone screen.

If you do not read the messages, this icon remains displayed on the screen. When it flashes, the memory is full.

Receiving icons, backgrounds or tunes can take several seconds. Messages inform you of the progress of the download.

You have the facility to do the following at any time:
- To mask this progress screen by pressing the left programmable key to make a call or access other telephone information.
- Or stop the download in progress by pressing the right programmable key.

Consult your network operator on the downloading of icons, backgrounds or tunes.
Messages

Received messages are stored in the SIM card or in the telephone until you choose to delete them.

Inbox

From the Messages menu choose the Inbox menu and Select.
Each message contains information on type of message (in the form of an icon) and time (or date) of reception.
Unread messages are entered in bold and arranged by arrival time and date.
Select a message and press the right programmable key. Choose from the options offered (Read, Forward, Delete read, reply, reply with original message, call, send, delete, delete all).
If your message contains objects (images or sounds), you can save them in order to use them later (stored in your telephone’s memory); when reading text, place the cursor on the object and choose the Save option from the options on the right programmable key. When they have been stored in memory, the space required in the telephone is then indicated.
You can consult them in the corresponding menus (WAP bookmarks in WAP, tune in Sounds, backgrounds in Background, and icons in Call groups).

Drafts

When you store a composed message, it is stored among the drafts.

From the Messages menu choose the Drafts menu and Select.
Select a message and press the right programmable key. If you do not delete this message, it will remain as a draft and can be re-used even if you have already sent it.
Choose from the options offered (Read, Send, Delete, Delete all, Modify).
Messages

Sending options  Several sending options are offered.

From the Messages menu choose the Send Options and Select.
From the send options offered (acknowledgement, reply offered, period of validity - life cycle of message on network before being routed -, message format, message centre).

Memory  You may want to know the memory available for saving messages.

From the Messages menu select the Memory option and Select.
The screen shows you the memory available on the SIM card and in the telephone.
WAP

WAP (Wireless Application Protocol): protocol that translates the Internet language into WML language that can be read by a mobile. The WAP function allows you to log onto certain Internet sites. You can log onto sites that allow you to download tunes, icons or animated screensavers to your telephone.

The WAP Menus

The WAP navigator is under licence:

The WAP navigator is the exclusive property of Openwave. For this reason it is forbidden to modify, translate, disassemble or even decompile all or part of the software that makes up the navigator.

You can activate the magnifying glass to increase the size of the characters by holding down the # key.

You can download tunes, icons or animated screensavers to your telephone.

The Services menu, a dropdown menu, can be accessed at all times when navigating through WAP pages.

Select the top left icon using the ▲ up key.

Consult the menu using the right programmable key.

The Services menu contains all the following sub-menus:

Welcome: logs onto the home page.
(carry the name of your access provider)

Bookmarks: is used to save in a phonebook the names and addresses of Internet sites to facilitate easy access.
You can receive bookmarks from SMS and add them to this list (see chapter on SMS). You can also send messages by SMS: select a bookmark, press the right programmable key (Choice), then select Send by SMS.

Go to URL: this menu allows you to input an Internet address directly.

Inbox: this menu allows you to consult messages sent by the Internet site.

Save image: is used to save a WAP site image (option).

Reload: refreshes the current page.

Clear the cache: clears the stored information on previous logons.
WAP

Advanced... offers the following advanced settings:
- Configuring parameters
- Show URL
- Logoff
- Circuit message (if user can confirm each logon)
- Security (is used to access information on making WAP connections secure).

About...: information on the browser.
Exit: returns to the telephone's home page.

Configuring WAP parameters

Select the Advanced... menu, then the configuration menu. Choose from the sub-menus offered:

Logon parameters is used to select or modify your access provider's logon parameters or configure the parameters of other access providers.

The active access service is preceded with a start.

Configuration of WAP parameters:
All information to be entered in the parameters are provided by your operator or access provider.
- Choose desired access service, then press Choice.
- Enter title of service and accept.
- Enter Internet address of home page and accept.
The GSM parameters to be entered are:
- User name
- Password
- IP address of WAP gateway
- Port type (secure or insecure)
- Call number
- Access mode (digital, analogue or automatic)

In automatic mode access can be gained to the operator's network by a digital link and by an analogue link to a different network (in roaming).
Once all the settings have been entered, you can activate the chosen access provider. Select him from the list. Confirm your choice with OK. **Inactivity time** is used to choose the time after which the call is automatically disconnected if you have forgotten to log off from a service.

### WAP Logging on

Using the **Welcome** menu, you can log onto your access provider’s WAP site by pressing the **right programmable key**.

If you are logging onto the GSM network, the @ symbol flashes, the metering of the cost of the call starts as soon as it stops flashing.

### Downloading objects

Some WAP sites allow you to download ring tones, icons or animated screensavers. Once downloaded, they are stored in your telephone’s memory. You can then save them in your telephone (same operation as used for downloading using SMS).

### WAP Logging off

To log off press **Stop key**.

The logoff happens automatically after a few seconds of inactivity if you forget to log off.

This period is defined by the inactivity time setting.
Games

Picture puzzle

Your phone is supplied with the game: Picture puzzle.

From the Picture puzzle menu press Select.
On line help is supplied to use the game.
Sounds

This menu allows you to customise the ring tones on your telephone and to activate beep and vibrate modes.

Volume and ring tone

This menu allows you to allocate a ring tone to each type of event.

From the Sounds menu choose Ring tone menu and Select.

Select the type of event from the list offered (Alarm, Calls, Messages and Fax) and accept.

Select the ring tone from the list offered and accept.

Adjust the volume using the down / up keys and accept.

You can deactivate the sound by pressing the * 3 key.

Vibrate

This menu allows you to activate the vibrate mode for calls.

From the Sounds menu choose the Vibrate menu and Select.

Select the vibrate mode from the choices offered (ring tone and vibrate, vibrate only, vibrate inactive or vibrate plus ring tone) and accept.
Sounds

WARNING: vibrate mode is not a priority in relation to the choice of ring tones in the call groups. To make vibrate mode apply in general, switch to Silent mode.

Silent mode
This menu allows you to switch to Silent mode.

From the Sounds menu select Silent mode and Select.

Activate or deactivate Silent mode and accept.

Silent mode can also be accessed via the home page by holding down the 2 key.

When the device is in silent mode, the relevant icon appears on the home page.
In this mode the ring tone will not function, except for the alarm clock.

Beeps
This menu allows you to activate a beep for each type of event.

From the Sounds menu choose the Beeps menu and Select.

Select the type of beep you want to allocate from the choices offered (Key beep, Network beep or Battery beep) and accept.
Activate or deactivate the beep and accept.

In the case of key beeps, you can also choose from the two types of beeps offered: key beeps or Dtmf tone (different beep depending on the key pressed).
Background

This menu allows you to customise your screen by choosing the colour, background image, animation or greeting message.

Colours

This menu allows you to display the colours you want on your mobile.

From the Background menu select the Colours menu and Select.

Select the colour you want to see during navigation from the menus and accept.

Wallpapers

This menu allows you to display the background image you want on your mobile.

From the Background menu select the Wallpapers menu and Select.

Select the Wallpaper and Select (right programmable key). The image appears in the background of the home page.

Press the right programmable key to select this choice, or the left programmable key to return to choice.
Background

Screensavers  

This menu allows you to display an animation when the telephone is in standby mode.

From the Background menu select the Screensavers menu and Select.
Select a screensaver from the options offered and accept. The chosen screensaver appears on the screen, accept it.
Adjust the screensaver display time (greater than 60 seconds) and accept. The screensaver appears at the end of each period of inactivity.
Warning: the animated screensaver uses processing power. For a better efficiency you can deactivate the screen saver or select the activation time to be more than every 300s.

Greeting message

This menu allows you to customise your greeting message.

From the Background menu select the Greeting message menu and Select.
Enter the text that you want to see appear in the greeting message (when you switch on) and accept.
Settings

This menu allows you to customise the settings of your telephone to make it as convenient as possible for you to use.

Date / Time

This menu allows you to set the date and time of your telephone.

From the Settings menu select the Date / Time menu and Select.

Date: set the date by entering it directly in digital form or by using the down / up keys.
Use the right key (or left ) to access the next (or last) input field.
Once the date is correct, accept it.

Time: same procedure as for setting the date.

My Objects

This menu allows you to find out how much memory is available for objects.

From the Settings menu select the My objects menu and Select.

The amount of memory available is displayed. This memory is divided between your downloaded ring tones, wallpapers and screensavers.

You can delete your objects to increase the memory available for new downloads.
From the **Settings** menu select the **Languages** menu and select. Select the language of your choice and accept. If you select **Automatic**, the display language will be the language of your SIM card.

From the **Settings** menu select the **Networks** menu and select. Choose **Preferred** to view all the pre-registered networks. Choose **Selection** to activate (automatically or manually) one of the networks accessible in the area in which you are located.
Settings

Contrast

This menu is used to adjust screen contrast.

From the Settings menu select the Contrast menu and Select.

A test screen allows you to adjust the contrast by means of the down / up keys and enter.

Energy saving

This function is used to deactivate the screen backlight.

From the Settings menu select the Energy saving menu and Select.

Activate or deactivate the backlight and accept.

By deactivating the screen backlight you increase the battery life of your telephone.

WARNING: display legibility is reduced.
Settings

Shortcuts This menu allows you to allocate functions to the programmable keys.

From the Settings menu select the Shortcuts menu and Select.

Select the key that you wish to modify and accept.

Choose the function that you want to allocate to this key and accept.

Reset Settings This menu allows you to reset all your telephone’s settings.

From the Settings menu select the RES menu (Reset) and Select.

WARNING: you are about to lose all the downloaded objects and all the settings made on your telephone since you bought it.

A validation screen allows you to confirm this choice.

The telephone switches off and resets automatically when powered up to take account of the change of settings.
The Calls menu allows you to manage and consult all your telephone's incoming and outgoing calls that are marked as follows:

- **Incoming call**
- **Outgoing call**

### Forward calls

This menu allows you to transfer calls addressed to you.

Depending on your subscription, this service allows you to re-direct incoming calls to a different number or answer phonebox.

From the Calls menu select the **Calls Forwarded** menu and **Select**.

Choose the type of forwarding you want from the options available.
Calls

Fast access to the list of calls from the home page: press the Start key.

From the Calls menu select the View last calls menu and Select. Each call contains information on type of call (in the form of an icon), time (or date) and duration.

Select a call from the list and accept.

Choose from the options offered (Call, store in your phonebook, send a message, delete, delete all).

You can also make the call by pressing the Start key.

View last calls

This menu allows you to access the list of last numbers used.

From the Calls menu select the View last calls menu and Select.

Select a call from the list and accept.

Choose from the options offered (Call, store in your phonebook, send a message, delete, delete all).

You can also make the call by pressing the Start key.

Counters

This menu allows you to consult the duration of the outgoing calls.

From the Calls menu select the Counters menu and Select.

Choose the type of counter you want from the options offered.
Calls

Display number

This menu allows you to modify the status of the display number function.

From the Calls menu select the Display number menu and Select.

Choose from the options offered (Anonymous mode, My number, Caller's number).

Anonymous mode
You have the facility to mask your number on the telephone from the person you are calling.

Initial: network default mode.

No: you choose not to activate anonymous mode and so to display your number.

Yes: you choose to active anonymous mode and so not to display your number.
Calls

During a call you may be informed that a caller is trying to reach you: you hear a special tone. The caller's number is displayed on the screen (or the caller's name if it has been stored).

Call waiting (Operator-dependent service)

From the Calls menu select the Call waiting menu and Select.

You can activate, deactivate, or consult the status of the call waiting service in order to check if it is active or not.

During a call, if a second caller tries to contact you, the screen displays the call warning.

Automatic redial

This menu allows you to call back a person you tried to reach.

From the Calls menu select the Automatic redial menu and Select.

You can set the redial function to inactive, on demand or systematic.

If you choose On demand, your telephone will offer to redial your caller automatically if the number is busy.
Calls

Answer phone number

This function is used to set your answer phone number.

This number will be used when you make a call from the answer phonebox using the programmable keys.

From the Calls menu select the Answer phone number menu and Select.

Enter your answer phone number and accept.

Local info

This menu is used to activate reception of local information broadcast by the network.

You can choose whether or not to receive information (ask the company with which you took out your subscription).

From the Calls menu select the Local info menu and Select.
Security

This menu allows you to configure your phone's security settings.

Keypad locking

This menu allows you to lock the keypad.

From the Security menu select the Lock keypad menu and Select.
Select Activate or deactivate and accept.

The lock icon appears on the home page.
This function is also available in the home page via a combination of the * and Select keys (right programmable key).

PIN number

This menu allows you to activate and modify your phone's PIN.

From the Security menu select the PIN number menu and Select.
To modify the PIN, select Modify and Select.
Enter old PIN and accept.
Enter new PIN twice and accept.
To activate or deactivate the PIN, select the Check PIN menu and Select.
Enter PIN and accept.
Select Activate or Deactivate and accept.
Security

The Phone code menu allows you to activate the phone code so that it is requested and checked whenever the phone is switched on if a different SIM card is used. This code is automatically linked to the SIM card installed when the phone is activated.

* This function may or may not be available depending on your SIM card.

Proceed as above in order to activate, deactivate or modify PIN number 2 of your phone.

To activate or deactivate the phone code, select the Phone code menu and accept. Enter 0000 and accept. Select Activate or Deactivate and accept.

To modify the phone code, select Modify and accept. Enter old phone code and accept. Enter new phone code and accept. Enter phone code again to verify it and accept.
Security

The Confidentiality function is used to delete numbers stored in View last calls and the SMS stored in the memory when a new SIM card is inserted into the phone.

Confidentiality

From the Security menu, select the Confidentiality menu and Select.
Select Activate or Deactivate and accept.

Operator code

This menu allows you to modify the call barring.

From the Security menu, select the Operator code menu and Select.
Access to this service depends on your type of subscription.
Security

Call barring can be applied to ALL calls (incoming and outgoing), to all incoming calls when you are away from your home country (if roaming available).

From the Security menu, select the Call barring menu and Select.

Select Activate or Deactivate and accept.

Access to this service depends on your subscription type.

Fixed dialling

This menu allows you to restrict the sending of calls.

From the Security menu, select the Fixed dialling menu and Select.

Select Activate or Deactivate and accept.

By activating this function, you can send calls only to the numbers stored in this phonebook.

This phonebook is linked to the SIM card, and its size depends on the card's capacity.
Accessories

This menu allows you to access the various accessories offered by your phone: calculator, converter, alarm, timer, car kit, data parameters.

Calculator

This menu allows you to use your phone as a calculator.

From the Accessories menu, select the Calculator menu and Select.

You can use the calculator with the help of the following keys:

- Up key: Add
- Down key: Subtract
- Right key: Multiply
- Left key: Divide
- Right programmable key: Equals
- Left programmable key: Delete
- * or #: Decimal point.

If no calculations are being run, the Right programmable key allows you to use the value in the converter directly.
Accessories

Converter

This menu allows you to convert one currency to another.

From the Accessories menu, select the Converter menu and Select.

Enter a value and press the Up key \( \uparrow \) to convert from one currency to another, or the Down key \( \downarrow \) to convert back.

The right programmable key allows you to use the following options:

- **Rapid exchange**
  If you check the Rapid exchange box, the converter will work in the home page by entering the desired numbers and pressing the up / down keys to make the conversion.

- **Exchange rate**
  Enter the rate of exchange corresponding to the chosen currencies.

- **Currencies**
  Enter the two types of currencies to be converted.

- **Go to calculator**
  This option allows you to immediately use the value converted in the calculator.
Accessories

The alarm works even when the phone is switched off.

**Alarm**

This menu allows you to set and activate the alarm.

From the Accessories menu, select the Alarm menu and Select.

Activate or Deactivate the alarm and accept.

Set the waking time by entering the numbers directly or using the down / up keys and accept.

The alarm icon appears on the home page.

**Timer**

This menu is used to set and activate the timer.

From the Accessories menu, select the Timer menu and Select.

Activate or Deactivate the alarm and accept.

Set the duration by entering the numbers directly or using the down / up keys and accept.

The alarm icon appears on the home page.
Accessories

Car kit  This menu allows you to configure your phone with a car kit.

From the Accessories menu, select the Car kit menu and Select.

Choose from the options offered (Automatic response, Switch off, Alarm timing, Hands-free volume control).

Data  This menu is used to configure the data exchange with a Personal Computer.

From the Accessories menu, select the Data parameters menu and Enter.

Choose the correct speed depending on the Personal computer you would like to connect to the handset.
Services

This menu allows you to access numerous services offered by your operator. The list of these services will appear in the menu depending on your subscription.

From the Services menu, choose from the list offered.
Technical features

Use of your phone is subject to safety measures designed to protect users and their environment.

Electrical safety:
Only use those chargers listed in the manufacturer’s catalogue. Using any other charger may be dangerous; it would also invalidate your warranty. Line voltage must be the same as that indicated on the charger’s serial plate.

Aircraft safety:
You must switch off your phone on aeroplanes when so instructed either by cabin crew or by signs. Mobile phone use may be dangerous to the operation of the aircraft and may disrupt the phone network.

Explosive materials:
Please comply with signs at petrol stations telling you to switch off your phone. You must also observe radio equipment usage restrictions in chemical plants, fuel depots and at any location where blasting operations are under way.

Electronic medical equipment:
Your phone is a radio transmitter which may interfere with electronic medical equipment such as hearing aids, pacemakers, etc. Your doctor or the manufacturers of such equipment will be able to give you any advice you may need in this area. Always make sure that your phone is switched off in hospitals when so instructed by signs or by medical staff.

Road safety:
Except in emergencies, do not use your phone when driving unless you have a hands-free kit enabling you to manoeuvre freely. In order to give your full attention to driving, stop and park safely before making a call. You must comply with any current legislation.

This mobile phone complies with European requirements governing exposure to radio waves.
Your phone is a transmitter/receiver. It has been designed and manufactured to comply with radiofrequency energy exposure limits recommended by the Council of the European Union and the ICNIRP for the entire population. These limits were established by independent scientific agencies on the basis of in-depth and regular evaluations of scientific studies. The limits include a large safety margin that is intended to guarantee the safety of all, irrespective of age or state of health.

The exposure standard for mobile phones uses a unit of measure called the SAR, or Specific Absorption Ratio. The SAR limit recommended by the Council of the European Union and the ICNIRP is 2 W/kg*. Tests were conducted on a standardised usage position basis, with the phone transmitting at its maximum level certified in all its frequency bands. Although the standardised measurement is done at maximum power, the real SAR of the phone in use is generally very far below the maximum value. The phone was designed to operate at the power level strictly necessary to ensure communication with the network. In general, the closer you are to a base station, the lower the power at which the phone will transmit.

Validation of conformity with European directive 1999/5 (directive R&TTE) is a pre-requisite for introducing any model of phone onto the market. Protection of health and the safety of the public and the user are a vital requirement of this directive. This model’s maximum SAR value measured in the conformity test is 0.64 W/kg. Although differences may exist from one phone to the other and depending on position, all comply with European regulations.
Technical features

Advice for limiting exposure to radiofrequency (RF) fields

For individuals concerned about limiting their exposure to RF fields, the World Health Organization (WHO) provides the following advice:

Precautionary measures: Individuals: Present scientific information does not indicate the need for any special precautions for the use of mobile phones. If individuals are concerned, they might choose to limit their own or their children’s RF exposure by limiting the length of calls, or using "hands-free" devices to keep mobile phones away from the head and body.

Further information on this subject can be obtained from the WHO home page http://www.who.int/peh-emf WHO Fact sheet 193: June 2000.

*The SAR limit for phones used by the general public is 2 watts/kilogram (2 W/kg) on average for 10 g of tissue. This value includes a large safety margin to increase protection and to take account of the variations in measurements. The SAR information may vary in different parts of the world, depending on declared national requirements and the frequency bands used by the network.
Warranties

Usage precautions
Your mobile phone allows you to download ring tones, icons and animated screensavers. Some of these items may contain data that may cause malfunctions of your mobile phone or data losses (virus for example). For this reason, Sagem rejects all responsibility concerning (1) the reception of downloaded data or losses of the said data, (2) the impact on the operation of the mobile phone and (3) damages resulting from receiving the said downloaded data or loss of said data. In addition, Sagem states that a failure caused by receiving downloaded data that do not comply with the specifications set by Sagem is excluded from the warranty. Consequently, the diagnosis and repair of a phone infected by the said downloaded data will be at the expense of the customer.

Warranty conditions
Whenever you wish to make use of the warranty, please contact your vendor and present him with the purchasing paperwork that he gave you.

If a fault occurs, he will advise you.

If you bought your phone directly from SAGEM SA, the following rules will apply:

1. The new equipment (excluding consumables), including new accessories bundled with the phone, are guaranteed by SAGEM SA, parts and labour (apart from travel) against any manufacturing fault for a period of twelve (12) months with effect from the sale of the equipment by SAGEM SA to the customer, on presentation of the paperwork stating the purchase date of the equipment.

   Equipment that has been repaired or replaced as standard during the warranty period stated above is guaranteed (parts and labour) until the later of these two dates:
   - Expiry of the guarantee period of twelve (12) months stated above or
   - Three (3) months with effect from the support provided by SAGEM SA.

   In any disputes, the equipment is covered by the legal warranty against the consequences of faults or hidden defects in compliance with articles 1641 and subsequent of the French civil code.

2. All faulty equipment under warranty will be replaced or repaired free of charge at SAGEM SA’s option (with the exclusion of repair of any other damage), once it has been specified that the work required for the application of the warranty will be done in a workshop and that the return costs (transport and insurance) of the equipment to the address to be indicated to it by the SAGEM SA after-sales service, whose phone number will appear on the delivery note, will be charged to the customer.

   Subject to essential legal provisions, SAGEM SA does not accept any warranty, explicit or implicit, other than the warranty provided expressly in this chapter, nor shall SAGEM SA accept responsibility for any immaterial and/or indirect damages (such as loss of orders, loss of profit or any other financial or commercial damage) under the warranty or not.

3. The acceptance of an item of equipment under warranty demands that a purchase document that is legible and without modification, stating vendor’s name and address, date and place of purchase, type of equipment and IMEI, be attached to the warranty, and that the information on the equipment identification label is legible and that this label or any other seal has not been tampered with.

   The warranty applies in normal conditions of use.
Warranties

Prior to sending the equipment for repair, it is the customer’s responsibility to backup at his expense the customised data stored in the equipment (phonebook, settings, wallpapers). A list of backup facilities can be provided by SAGEM SA on request. The responsibility of SAGEM SA cannot be invoked if damage occurs to customer files, programs or data. The information or operating elements and the contents of files will not be re-installed in any case in the event of loss. SAGEM SA may decide, at its option, to repair the equipment with new or reconditioned parts, replace the equipment with new equipment or, in any dispute, equipment in good working condition. During its work SAGEM SA reserves the facility to make, where necessary, any technical modifications to the equipment where these modifications do not adversely affect its initial purpose.

Faulty parts to be replaced during a repair under warranty will become the property of SAGEM SA.

The equipment repair and standstill time during the warranty period may not lead to an extension of the warranty period as stated in article 1 above, provided no other vital provisions have been agreed.

The application of the warranty is subject to the full payment of the sums due for the equipment when the request for support is made.

4.

The following are excluded from the warranty:

- Breakdowns or malfunctions due to non-compliance with the installation and use instructions, to an external cause of the equipment (shock, lightning, fire, vandalism, malice, water damage of any type, contact with various liquids or any harmful agent, unsuitable electric current...), to modifications of the equipment made without the written consent of SAGEM SA, to a servicing fault, as described in the documentation supplied with the equipment, to lack of supervision or care, to poor environmental conditions of the equipment (especially temperature and hygrometry, effects of variations in electric voltage, interference from the mains network or earth) or even due to a repair, a call-out (opening or trying to open the equipment) or to servicing done by personnel not approved by SAGEM SA.
- Damage resulting from inadequate packaging and/or poor packing of the equipment sent back to SAGEM SA.
- Normal wear and tear of equipment and accessories.
- Communication problems linked with a poor environment, especially:
  - Problems accessing and/or logging onto the Internet, such as breakdowns of the access network, the failure of the subscriber’s or his correspondent’s line, transmission fault (poor geographic coverage by radio transmitters, interference, disturbance, failure or poor quality of phone lines...), a fault inherent to the local network (cabling, file server, user terminal) and/or transmission network fault (interference, disturbance, failure or poor quality of the network...).
  - Change of parameters of the cellular network made after the equipment was sold.
  - Supply of new software versions.
  - Current servicing work: delivery of consumables, installation or replacement of these consumables...
  - Call-outs for equipment or software modified or added without the written consent of SAGEM SA.
  - Faults or disruptions resulting from the use of products or accessories not compatible with the equipment.
  - Items of equipment returned to SAGEM SA without having complied with the return procedure specific to the equipment covered by this warranty.
  - The opening or closing of a SIM operator key and call-outs resulting in the non-operation of the equipment resulting from the opening or closing of SIM operator key done without the agreement of the original operator.
Warranties

5. In the cases of warranty exclusion and of expiry of the warranty period, SAGEM SA shall draw up an estimate to be given to the customer for acceptance before any call-out. The repair and carriage costs (there and back) given in the accepted estimate will be charged to the customer.

These provisions are valid unless a special written agreement has been made with the customer, and shall apply in mainland France. If one of the provisions turns out to infringe a legally essential rule that consumers could have the benefit of under the national legislation, this provision will not be applied, but all other provisions will remain valid.

Troubleshooting

**PROBLEM - SITUATION**

No call connection

Check the called number. Check that at least one signal strength bar is present. If the R icon appears without any operator name being displayed, only emergency calls are possible. Check that your call credit with your operator has not been used up. Check that the SIM card used offers the service that you are requesting and that its validity has not expired. Check and deactivate the restriction on outgoing calls if necessary. The network is overloaded. Call again later. If the poor call connection persists, contact the hotline.

No call reception

Try to make a call to check that the phone and the network are operational. Check and deactivate the permanent calls forwarded (permanent calls forward icon displayed). Check and deactivate the restriction on incoming calls if necessary. If the poor reception persists, contact the hotline.

Network reception less good during a call

Avoid holding the phone with your fingers at the top of the rear cover; this creates an obstacle for the antenna located at this spot.

Impossible to send message

Check that the SIM card used offers this service. Try to make a call to check that phone and network are operational. Check the answer phone number is properly configured. To do this, go to the "Calls" menu, select "Answer phone number" and check the number. Otherwise, enter your operator’s answer phone centre number.

No answer phonebox

Check that the SIM card does offer this service. Programme the call to be forwarded to answer phone using the information provided by the operator.

Answer phone icon flashing

Call the answer phone to make it disappear.

Backlight does not work

Go into the Settings menu, select Energy saving menu and activate backlight.

In WAP context:

SERVER NOT ANSWERING message

In the WAP menu, Clear the cache.

Logon to home page impossible

Go into the Settings menu, select Networks, then Selection. Wait until the operator appears, select it and accept.

Operator name does not appear on screen

Go into the Settings menu, select Networks, then Selection. Wait until the operator appears, select it and accept.

How do I (un)lock the keypad?

3. Hit * key, then the right programmable key "OK".
Troubleshooting

<table>
<thead>
<tr>
<th>PROBLEM - SITUATION</th>
<th>ACTIONS</th>
</tr>
</thead>
<tbody>
<tr>
<td>How do I switch to silent mode?</td>
<td>Hold 5 key down unless ring tone sounds, when a short touch is enough. Can be activated only in SMS and WAP screens; hold down 9 key.</td>
</tr>
<tr>
<td>How do I activate zoom?</td>
<td>This envelop means that you have written or answer phone. To remove it, all you need to do is enter the &quot;Messages&quot; menu to read your messages. The envelop is then deleted. In the case of a voice message, contact your answer phonebox and let it guide you.</td>
</tr>
<tr>
<td>How do I remove the envelop that appears on the screen?</td>
<td>This receiver means that you have received answer phone in your message box. To remove it, call your answer phone.</td>
</tr>
<tr>
<td>How do I lift the receiver that appears on the screen?</td>
<td>Press the Stop key to return to the home page without messages.</td>
</tr>
<tr>
<td>How do I remove the written message at the down of the home page (1 call)</td>
<td>Logon to one of the following site via your computer: <a href="http://www.planetesagem.com">www.planetesagem.com</a>. This site offers to send ring tones to your phone in the form of an SMS. You can also logon to your operator’s site. Once the SMS has been received, all you have to do is save it: accept the option “Save messages”, the tune will then be added to your list. In addition, you can logon to some sites by phone.</td>
</tr>
<tr>
<td>How do I download ring tones?</td>
<td>Go into the Messages menu, select Compose and enter your message using the T9 script (predictive input method), which is the default entry mode.</td>
</tr>
<tr>
<td>How do I free up memory to download my objects (sounds, images)</td>
<td>Go into the Settings menu, select My objects then delete some objects (too many).</td>
</tr>
<tr>
<td>How can I increase the efficiency of my phone?</td>
<td>The most efficient actions are as follows: You can deactivate the backlight (in the menu Settings/Energy saving) or be carefully where you keep your phone to make sure that the keys can’t be pressed accidentally because any key press will activate the backlight. You can deactivate the screensaver or select the activation time to be more than every 300s (the screensaver uses processing power). Make sure that you don’t obstruct the antenna with your fingers when using the phone (see page 14).</td>
