

O2 Wifi Pro

Wifi for everyone

Public Wifi and WAN services to help you run your business. Fully managed by O2.

Your staff can get online with access to your corporate resources. While your customers can easily connect to the fast, free Wifi service.

Telefónica

Benefits for your employees and visitors

O2 Wifi is free to use

It's available nationwide and in thousands of venues. Your temporary staff, contractors and visitors don't have to be on O2.

Quick and easy registration

Visitors and employees will need to sign up once and seamlessly auto-connect any time after that. No usernames. No passwords to connect.

Fast and reliable

O2 Wifi is a secure public wifi service. It's continuously monitored.

No impact on your network

Employees can connect to the internet on their own devices at work without using up any of their mobile data allowance and there's no compromising of your corporate data network.

O2 Wifi Pro makes your business work

Connecting customers & visitors, as well as staff, to public O2 Wifi or O2 Office Wifi. An additional Corp SSID keeps your public traffic separate from your business traffic.

Improved uptime with Enterprise grade equipment gives you improved uptime. We're a Cisco partner.

CCTV, music and radio streaming. You can plug additional services into your wifi without compromising quality.

Facilitating secure payment traffic through 3G/4G backup keeping your payment traffic safe.

Network visibility means you can manage the status of your estate in real time.

Footfall and insights means you can gather in-depth insights from your customers.

QoS and traffic management means you can prioritise your business traffic.

Public WiFi Compliance

We take care of all the regulatory and compliance requirements that come with providing a public access wifi service. So you don't have to manage non-corporate traffic or any associated liability.

Data integrity

Data that runs across O2 Wifi for Office is kept separate from corporate data. People can only access corporate resources if they have a secure VPN.

Security

Your organisation will benefit from our network's robust security and content filtering.

Consistent experience

You can provide a consistent experience for employees and visitors by personalising your O2 Wifi for Office welcome page.

Overlay or build from scratch

We can overlay O2 Wifi on your existing infrastructure, or we can build it for you from scratch.
