Free, automated device enrolment. Devices ready to go.

Our free enrolment service makes it easy for your people to use their new device the minute they get it. All compatible devices (Samsung, Apple and Android) can be set up with your device management (MDM) solution already applied – taking the pressure off your people in IT and giving them the chance to focus on the more important stuff.

Effortless set-up

All devices are automatically under your corporate management and control. People can simply sign into MDM/EMM agents with their credentials provided by your IT admin.

Ready-to-go

Your devices are ready for work as soon as you get them. There's no need to spend your time manually setting them up. Start working with your new device from the minute it arrives.

Free service

This is for our business customers. We think you'll appreciate having one less thing to worry about when it comes to making your business better connected.

Bulk deployment

Equipping your teams and rolling out hundreds or even thousands of phones at a time can put a big strain on the resources of your IT department. That's why we offer device enrolment to lighten your load.

Easy to scale

We make it easy for you to add new devices as you need them, so if your business is growing, you won't be held back by too little time or a lack of available technology.

Secure to use

When we send you enrolled devices, they'll be compliant with your business policies from the first moment they're unwrapped. That means you can worry less about compromised security. And to give you more peace of mind, your people can't make unauthorised changes in-life, nor can device management be removed or bypassed.

Multiple configurations

We can help you juggle multiple device management or enterprise mobility profiles from different vendors.

Handset agnostic

We're the first UK operator to offer enrolment services for Android, Apple and Samsung handsets. Perfect if you have a mixed estate or want to switch from one manufacturer to another.

Award-winning network

We won Best Business Network at the 2019 Mobile Industry Awards¹.

We won Best Network Performance at the Mobile News Awards 2019² and Best Network Coverage in the uSwitch Mobile Awards 2018 and 2019³.

Why O₂

Experience

We manage devices all across the world. We've been a leader in mobile-led business for 30 years, and we bring together the complete range of mobility solutions, including devices, applications, security and controls, connectivity and end-to-end management. All designed, delivered and managed in-life by platform experts to make sure everything runs smoothly.

Security

O₂ is the first network provider to have been awarded the government's CAS(T) certification for both our mobile and WAN networks⁴. It means you can rely on secure connections to your data, wherever it's used.

Expertise

The global Telefónica network is monitored by a best in-class facility based in Madrid – part of a network of eleven Security Operations Centres distributed worldwide – that showcases our capability as a major global player in security.

Want to know more?

If you'd like to make it easier to manage your devices, keeping them up-to-date with security software and enabled with the latest tools, speak to your Client Manager, call us on **01235 433507** or visit o2.co.uk/business
