Do what you do **Better than before**

There's no going back. Remote working is here to stay.

You only have to look at the research¹ that reveals three in five employees expect remote working to be the new default.

Those employees are very different now too. They're part of a dynamic workforce¹ with many different expectations for work.

61%

of employees now feel remote working should be the new default

85%

of employees wanting flexible work hours

48%

of respondents stated that they would be more productive if they were equipped and supported to work in their preferred way

[To learn more, read the research](#)

But what does this all mean for your organisation?

It means doing what you've always done but creating more scope for innovation, collaboration and flexible working.

Microsoft has all the tools you need to run a successful operation. And we understand how to design, set up and support Microsoft environments tailored to individual organisations.

Together, we enable you to do what you do better than ever before with all your operational, productivity and security tools taken care of.

Why O₂ for Microsoft?

Well, there's five big reasons.

1

We put employee experience first

We can help you set up, run and manage your Microsoft environment. That way your people can just get on with the job

2

We'll keep things simple

We offer you a single supplier for everything you need. Plus, the managed services that take away day-to-day hassle

3

We'll help you control your costs

We can right-size your Microsoft environment, check you've got the right licences and make sure people make the most of your investments

4

We're security conscious

We work hand-in-hand with sister company, Telefónica Tech. Which means you can call on a team with global cyber security credentials

5

We're experienced

We've been a mobile-led business for over 30 years and a Microsoft Gold Partner for over 7 years. So we know what it takes to look after all your devices, apps, data and controls

Where do you want to start?

We get that every organisation is different.

You might want to start at the beginning and design your Microsoft set-up from the ground up. And may need support to reduce IT time and effort looking after your Microsoft estate. Or you might need a partner that can do a health check of your current estate and come up with some recommendations to help your people use Microsoft to be even more productive, improve collaboration and to stay secure wherever they're working.
