

The Casebook 3 for Healthcare – exclusively from O2

O2's low-cost, ruggedized two-in-one tablet is designed specifically for the needs of the healthcare sector.

As NHS budgets continue to decline, stretched thinner to support an ageing population that has ever-greater care expectations, every pound has to deliver the very greatest value, and do so over the longest possible period of time.

New ways of working are essential to achieving the operational efficiencies necessary, and that's created a need for reliable data entry systems that are both mobile and digital.

In partnership with TETRATAB, O2 brings you the Casebook 3

- The first tablet that is ruggedized especially for the needs of the NHS and is available exclusively through O2, the only CAS(T)-certified network and WAN provider.
- Highly robust design for a long life of busy hospital use, featuring shock resistance, and an IP52 rating for dust and water resistance.
- Latex-free construction – with an antimicrobial coating. It's resistant to surgical wipes so that it can be quickly disinfected reducing costs, impact on the environment and most importantly prevent the spread of hospital acquired infections.

- Long, six-hour battery life when used continuously (up to nine days on standby), so can last even the longest of doctors' rounds.
- Enables strong security compliance with optional handgrips that have NFC smart-card holders for NHS ID cards.
- Lightweight, well-proportioned with a crystal-clear 10.1" LCD and your choice of either Microsoft Windows 10 or Google Android 6 (Marshmallow) software.

The tablet enables smarter working and improved collaboration. It gives NHS staff the ability to access and update patients' records directly from their bedsides, saving time typing them up afterwards, improving accuracy, and saving paper to help improve sustainability.

We are dedicated to running our business responsibly. Through our environmental initiatives, we've become the UK's first telecoms network to be awarded the triple carbon standard for carbon, waste and water. Our solutions and flexible working enable us to drive paperless practices, and reduce travel and energy expenses in our clients' organisations, and our own.
